DETAILED ACTION

1. Applicant's amendments and remarks filed on 11/7/05 are acknowledged.
2. Claims 1-10 and 17-32 have been canceled.
Claims 11 and 16 have been amended.
Claims 11-16 are pending.
3. In view of Applicants' amendment to specification and claims, the objections and rejections set forth in the previous office action mailed 7/25/05 (sections 6-14) have been withdrawn.
4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
5. Claims 11-16 stand rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 6,211,142 B1 (IDS reference, of record) for the reasons set forth in the office action mailed 7/25/05.

Applicants' arguments filed on 11/7/05 have been fully considered but they are not persuasive.

Applicants traversed the rejection based on the '142 patent does not particularly teach the antibody that specifically binds to the amino acid SEQ ID NO:2.

As Applicants acknowledges in the remark filed 11/7/05, the '142 patent teaches gas6 antibodies and the gas6 variants are included in the scope of gas6 polypeptides (i.e. deleted, col. 5-6 overlapping, claim 16, i.e. domain D which comprises claimed SEQ ID NO:2). Thus the antibodies to gas6 encompass the antibodies to gas6 variants. Furthermore, the claim 11 as recited is not limited to the antibodies specifically binds to "the amino acid sequence consisting of the SEQ ID NO:2". The claimed limitation "an amino acid sequence according to SEQ ID NO:2" reads on any portion of SEQ ID NO:2 and is anticipated by any dipeptide or larger.

Since "according to" is considered open as is not defined in the specification, the claim encompasses any polypeptide of any length that has within its sequence of a peptide to SEQ ID NO:2 or portion of. The prior art teaches antibodies to a polypeptide that has within its polypeptide that is 100% identical to SEQ ID NO:2 (Examples 8, 10, and Fig 7, i.e. gD.gas6-C.IgG)

Thus, reference teachings anticipate the claimed invention.

6. No claims are allowable.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

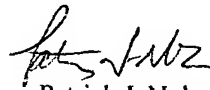

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
